Multilink Animals

Make an animal using *less than* 20 multilink cubes

This animal has legs 2 cubes long.
How many cubes long are the legs of your animal?

The animal's legs are now twice as long, how many cubes have been added?

Make the legs of your animal twice as long, how many cubes did you add?

Make another multilink animal, use 3 cubes for each leg.
How many more cubes will you need to make the legs twice as long?

Learning and Teaching Objectives

- Make models, shapes and patterns with increasing accuracy, and describe their features.
- Use the vocabulary of comparison.
- Use resources or drawings to help visualise the problem and as a way of recording
