

## The Wizard, the Frogs and the Wells

The wizard has turned 5 handsome princes into frogs.

He is now going to send them to live at the bottom of two wells.

How many should go into each well?

- Find different ways to do it
- Try with a different number of frogs

### Learning and Teaching Objectives

- Use developing mathematical ideas and methods to solve practical problems.
- In practical activities and discussion begin to use the vocabulary involved in adding and subtracting.
- Have a system for finding all possibilities
- Organise the recording of possibilities (drawings, ordered list)

## The Wizard, the Frogs and the Wells Solution

Well 1	Well 2
5	0
4	1
3	2
2	3
1	4
0	5
