

Managing Transitions for Children

Aim - This one day course aims to assist those working with Looked After Children in promoting emotional stability for children as they move from home to placement or between placements

Outcomes –

By the end of the day participants will be able to:

- Apply theories of attachment and loss to children who are Looked After
- Ensure that care plans take account of the need to promote a sense of security and develop resilience through paying attention to the protective environment
- Understand some of the factors which may contribute to placement breakdown
- Work with children, their families and carers to manage periods of transition, and make effective plans that focus on the needs of the child
