

The **Object** window allows fine control over the attributes and behaviour of objects such as a piece of text, a picture, a line etc.

Select an object or objects on a page

Name or type of object selected on the page

Position of object on the page

When a tick is in the box it means the object will have that attribute or behaviour.

**Locked** - When ticked object can not be selected or moved

**Moves** - If unticked objects can not be moved but can be selected etc

**Sizes** - If unticked objects can not be resized.  
This is very useful to stop children resizing objects when they drag them

**Editable** - If unticked text can not be edited.

**Copies** - When ticked multiple copies of the object are created. Click and drag the object for the copies.

**Prints** - If unticked the selected object will not show up when the page is printed.

**Hidden** - When ticked hides object on page.

**Crops** - When ticked photographs can not be cropped
